

# SEGWAY CICHLIDS

*Aqua Riva*  
Tropical Live Fish and Accessories  
Wholesalers

Stepping stone species every store should carry

## BALLON RAM *Microgeophagus ramirezi*

Temperature: 24-27

pH Level: 6.0-7.0

General Hardness: Soft

Grows to: 7cm

A completely iridescent blue dwarf ram that enjoys traditional community fish. Best in a pair, in a heavily planted aquarium with lots of hidey-holes. Don't just a book by it's cover, these fish wont dig up your plants.

## ANGEL FISH *Pterophyllum sp*

Temp: 25-29

pH 6.5-7.0

Hardness Soft - Med

Grows to 14cm

Best kept in pairs in a community tank, or small schools for cichlid heavy tanks. Make sure companions can't fit in their mouth, otherwise they won't just eat at meal time. Look out for platinum or veil tail angels for an added wow factor.

## KEYHOLE CICHLID *Aequidens Maronii*

Temperature: 24 Degrees

pH Level: 7-7.5

General Hardness: Soft - Med

Grows to: 10-12cm

A placid omnivore that lives for 10-12 years. They will eat almost anything you give and tolerate lots of different types of fish. Give them plenty of hidey holes and high quality food to bring out their colours.
